

Boen Oil Freshen Up is based on acrylic wax together with natural bee and palm wax. The product does not contain solvents and is also available in WHITE (white pigments), suitable for white oiled floors. Boen Oil Freshen Up gives excellent protection against dirt and moisture.

## Oiled floors -Boen Freshen up

### Range of Use:

Boen Oil Freshen Up is used especially for factory finished ready oiled parquet (UV oil).

### Instructions for Use:

Shake the tin and apply a thin coat of Boen Oil Freshen Up with a sponge or cloth. After 30-60 minutes drying time the floor is ready for use.

### Cleaning:

The floor should be cleaned preferably with the use of a dry mop or vacuum cleaner. When necessary the floor can be washed with Boen Floor Soap. Use a well wrung cloth and avoid water spillage on the floor.

### Maintenance:

A refresher coat can be applied when required, depending on wear and tear. It is difficult to state how often the floor should be treated, but the rule of thumb is one coat annually in private homes. Areas of public use should be maintained 3-5 times annually, according to need.

### Technical Specifications:

Use approx. 1 litre/100m<sup>2</sup>. Shake before use. Storage temperature must be in excess of 5°C. Shelf-life is approx. 5 years in unopened packaging. Ph. value 8 - 9.
